YOUR STYLE

Get creative and design your unique item.

Optimal wearing sensation without stiff flocks.

Club logo, sponsor and shirt number prints, as well as club and player names are applied to the shirts by imprinting. In the dye-sublimation printing, the colour is absorbed directly by the fibre. What does this mean for you? Flawlessness, colour fastness and breathability.

More than a million design options.

May be freely combined and result in an individual solution for you and your team!
Minimum order 10 items.

Make huge savings on flocking costs!

The integration of the shirt-number and the club- and player-names are free of charge.

Time of delivery

8 weeks from approval.

No additional costs!

CREATOR-SOCKS

Add the fitting shorts and socks to your individualized shirt, same as the suitable goalkeeper combination.

Create your individual socks with your own logo.

A PERFECT AWAY

GREY Mélange

INNOVATION FOR AWAY GAMES

The uhlsport GOAL jerseys have been expanded to include the color GREY Mélange, a new color for the playing field. However, the color is just the start – the neutral away jerseys can be flocked with any color you choose – and so adapted to your team colors. A large palette of colors are available to you along with special colors for your perfect

away game. Club teams can even select the neutral jerseys or sweats in GREY Mélange and then have their individual color design printed on them e.g. with their name and number.

THERMOBONDED

HIGHEND

Invincible: HIGH TEC footballs for pro football. Thermobonded means seamless thermal bonding of the ball as well as a unique ball design, which has been used in professional football for years. The result: perfect playing properties, optimal ball control, excellent roundness as well as a longer ball life.

SYNERGY

TEAMSPOORT

uhlsport **Synergy** are sewn footballs with additional adhesive on the seams and available at two different quality and price levels.

GENERATION 1

The procedure has deeper seams which combines the individual foam laminated ball panels and the new bladder design. The result: solid roundness, low air pressure loss and top play and flight characteristics.

GENERATION 2

Brand new construction exclusively by uhlsport

Double Foaming

Two foam laminates are directly bonded to the upper material. This provides excellent roundness and maximum ball control.

Preshaped Panels

The pre-embossed ball panels provides deeper seams. The result: optimal play and flight characteristics.

Gluing

Additional gluing of the seam ensure a seamless surface. The result: maximum ball control and low water absorption.

Wrapped Bladder

Unique bladder design construction provides für optimum roundness and very low air pressure loss.
